

Viking Planus

AUTOMATIC HAMBURGER MACHINE

BENEFITS:

- Fast production 35 Units per minute
- Small Bench Top Machine
- Only 240V Single Phase Power Required
- Safe Air Operated Foot Switch Controls
- No Tools Required
- Automatic Paper Magazine
- Manufactured in Italy

The **VIKING Planus Automatic Hamburger Machine** is compact, robust and easy to operate. Due to its small size and high output rates it can be easily adapted into either small or large production lines. The VIKING has a quick release insert drum allowing the operator to change the shape, weight and thickness of the burger. The VIKING processes up to 2,100 burger patties per hour and each unit can be placed on waxed separating paper before landing on the out feed conveyor. The machine is controlled by an air operated foot switch allowing the operator to have both hands free.

Made of Stainless Steel AISI 304 and other food grade materials the VIKING is easy to clean and does not require tools for dismantling for cleaning.
